The Qatar Health Tourism Board

Fakih IVF at a Glance

Fakih IVF is a leading network of reproductive medicine and assisted reproductive technology (ART) centers across the GCC, recognized for clinical excellence, advanced fertility technologies, and high success rates.

Founded by renowned pioneer in fertility care **Dr. Michael Fakih**, the group combines world-class specialists, cutting-edge genetic services, AI-driven solutions, and personalized patient care to help individuals and couples achieve their family-building goals.

GCC-WIDE NETWORK · AMERICAN-ACCREDITED SPECIALISTS · AI-INTEGRATED CARE

Fakih IVF FERTILITY CENTER

35,000+

families guided to parenthood across the GCC

Dr. Michael Fakih

Founder & Chairman, Blue Ocean Health – Fakih IVF

Dr. Fakih is a consultant in Reproductive Endocrinology and a renowned IVF expert whose leadership has helped shape fertility care across the GCC and Middle East for more than 30 years. Through his groundbreaking work, he has helped more than 35,000 families achieve parenthood.

Why Couples from Around the World Trust Us

World-Class Fertility Expertise

Thousands of successful pregnancies were achieved through decades of clinical excellence in reproductive medicine.

AI-Enhanced Fertility Care

Use of AI-powered technologies to support embryo assessment, diagnostic accuracy, and clinical decision-making for optimal fertility treatment outcomes.

State-of-the-Art Embryology Laboratories

Purpose-built IVF laboratories equipped with advanced incubators, embryo monitoring systems, and strictly controlled environments for embryo development.

Precision science, personalized to you

Cutting-Edge Genetic Technologies

Highly advanced genetic screening and embryo testing to support healthy embryo selection and implantation success.

High Standards of Safety & Quality

Our laboratories and clinical protocols follow internationally recognized quality standards, ensuring the highest levels of patient safety and clinical excellence.

Personalized Treatment Plans

Every treatment protocol is individually designed based on your medical history, fertility investigations, age, reproductive goals, and clinical needs.
